

CHECKLIST FOR GROWING BABIES

Developmental delay is when your child does not reach their developmental milestone at the expected time. Because every child develops at his or her own pace, your child may reach these milestones slightly before or after other children the same age.

3 Months	6 Months	12 Months
At three months of age, most babies:	At sixth months of age, most babies:	At twelve months of age, most babies:
<ul style="list-style-type: none"> — turn their heads toward bright lights — move both eyes in the same direction together — recognize bottle or breast — react to sudden sounds or voices — make cooing sounds — make fists with both hands — grasp toys or hair — wiggle and kick with arms and legs — lift head and chest when on stomach — smile 	<ul style="list-style-type: none"> — follow moving objects with their eyes — turn toward the source of normal sound — reach for objects & pick them up — switch toys from one hand to the other — play with their toes — help hold the bottle during feeding — recognize familiar faces — babble 	<ul style="list-style-type: none"> — sit without support — pull to a standing position — crawl — drink from a cup — play peek-a-boo and patty cake wave bye-bye — hold out their arms and legs while being dressed — put objects in a container — stack two blocks — know five or six words
