Wayne County Health Assessment Survey
<b>Do you have any comments that relate to your particular needs?</b>
"classes" on stress, family, etc that I have been to are to "simple, and/or basic". I am looking for a higher level of information.
As a counselor for families and children, I find there are not enough services locally for mental health services, especially psychiatric care. Too many pediatricians are taking on the role that requires a specialist because there isn't the access to care.
Dental expenses are big problem, making necessary treatments unaffordable. Most dentists do not offer a payment plan and the expenses not covered by insurance usually total over \$100 per person. Therefore making treatment unaffordable.
Frankly, Newark Wayne Hospital and many of the physicians located in Wayne are fine for routine things but they are not perhap willing or capable of dealing with serious illness.
From experience related to a family member, more needs to be done to keep the elderly in their homes.
Had 2 tears of meniscus in R knee repaired at N-W. Had 5th back surgery done at RGH
I am concerned w/talks of shutting down the home care unit @ Wayne co Public Health. These services are needed. My own family has used this service, and got good care. People of the community should have a voice on this issue not Supervisors of towns.
I believe our county should maintain a center for dialysis. There are too many diabetics in our county. Maybe there should be a survey on this!!
I do not have personal need of dialysis but do know of many friends and acquaintances who do. I don't understand why perhaps, Newark-Wayne Hospital doesn't offer dialysis treatments.

I don't believe that ANY ins. co. should over-ride Dr.'s orders.....any prescription or medical test written and deemed necessary by a Dr. should be covered!! This is a big problem to us who are low income...if ins. co.'s won't pay the cost - we can't afford to get the prescriptions and/or tests, and are forced to do without them! This in turn, worsens our health condition or illness. It's a serious problem amongst the low income families. (food/heat or medications? It's a tough choice!!)
I feel Public and Mental Health should flood the county with information of the services they offer. It is amazing what is offered and how little the public knows of these services.
I haven't had to use a lot of the county health services, but hope that Wayne Co. continues to offer a full range of health care and home health care for many years to come...I may need them someday and a lot of people are using them now. Public health visiting nurse program is irreplaceable...we don't want Monroe Co. taking care of our seniors etc at home...WE WANT WAYNE CO.
I wish I lived in a county where there were less people dependent upon the government for their health care needs. I pay for my health care and only go to receive care when it is necessary or prudent. I am tired of waiting in line at emergency rooms for people that have no costs involved in visiting a hospital for the common cold. This is a real problem for real healthcare.
I would like to see a great deal more emphasis on natural health and prevention. Our health care costs would be much more reasonable if we did not have as many toxic remedies.
If you watch the television, the drug companies advertisements make one believe that they can actually "talk to your doctor". What a joke. Not to stereotype here, but I've heard many experiences where doctors around 315 are stuck in the past about new medical ideas, are "in for it, only for the money", are foreign- where ya can't understand a thing they are saying-, kinda unfriendly, don't want to and won't talk to you about- accept(ing) medicaid. Someone needs to tell the drug companies about the "real world" with some doctors*. (* not ALL doctors, but there are some)
Insurance companies sometimes decide not to pay and then you are stuck with a large bill. This has been a problem for us, even when we thought we followed their directions, they have concluded that we did not and therefore are leaving us hanging to pay the bill. This is so wrong.
It is hard to get help for someone who is working to get help with medical, heating and other programs. It is a shame that someone is better off not working at all that trying to make something of themselves but can not get help to get over the hump. That part is just very sad to me.
It would be great if Wayne County would adopt a County-wide Sanitary Code similar to Cayuga County's to ensure there is consistent monitoring of Septic Systems thereby reducing risks to both well water and surface water quality.
just because an employer offers health insurance doesn't make it "affordable". I think that the county should offer CHP and FHP (etc) to families where their income is low enough that even when an employer offers it, it should not be a requirement that they take it. and there should be NO 30 day waiting period for children to receive such coverage when another insurance has been canceled.
More assistance in our county to help those in need of filing for SSD.
MORE FUNDS SHOULD BE GIVEN TO NEWARK HOSPITAL.
Private insurance is killing my budget and I do not qualify for Medicaid and there seems to be no middle ground. My own insurance covers nothing but catastrophic care. Too bad there isn't a plan available at group rates for the uninsured. I will probably have to drop my BC/BS due to the cost of \$480.
Remember your Wayne County Home Health Agency, they are the ones who care about our residents.
Thank you for providing this survey--hope you receive alot of responses! Take care--
The first part of the survey did not seem reasonable. The types of issues listed are potentially evident for someone in any county anywhere so I said yes to all of them. Whether I consider them issues government should be doing something about it would not be evident from this survey and the way the questions were worded.

There is not enough information for the elderly. The medicaid system and EPIC are very hard for the elderly and the lay person to understand. Your meetings are never at a good time for everyone to attend. The elderly are more at risk then the younger generation. You need to focus on the older population and find out what their needs and wants are, money, food, housing, drugs ( inexpensive drugs) Casodex cost over \$400.00 a month for 30 tablets before EPIC, cost of deductible for the elderly is more than a social security check, so what are they to live on? In Wayne County the poor get poorer and the rich get richer. But no one cares, about a 74 year old with prostate cancer and the cost of the drugs. You need to make it affordable for all. Now I see why so many oder people don't take their medications, or forget to eat, or forget to go to the doctors. It is the cost to stay at home. Many can't afford to pay for utilitys, house payments, fuel oil, food, vet bills, gas for their cars. Many don't qualify for help, because they have had to take a part-time job to help pay what social security does not. You want to help? I make one dollar more than the amount allowed to qualify for any of your services, now what quit my job and go on welfare, NO WAY. I will keep eating and drinking and smoking and not eating my vegetables and fruits. I will survive on my little social security check and hope someday you are old and only get \$1000.00 a month to live on and see how far your dollar goes. Oh yeah forget about your pension that went out the window a long time ago. So happy trails to you. You need to see the real world, not from a desk job.If and when I am ready to quit smoking I will let you know, yes I know what smoking will do to me, but guess what, someday NY will have to pay for my medical bills, because I will have COPD, so it is a full circle. Hope your survey helps, if not I have said something to get you thinking about your future as a senior citizen.

transporation is a major issue in Wayne county

Wayne County Services Suck!

Would love to speak with someone about partnering with my advocacy regarding essential tremor resources and referrals, one on one consultation;support groups etc; possible adding to the survey ? Any interest ? 315-626-XXXX

### Wayne County Health Assessment Survey

#### 1. COMMUNITY HEALTH: Any Other Health Problems.

Autism - from birth on  
 Back problems that affect their ability to work.  
 being insured is a HUGE problem in this county  
 Cancer clusters within the village  
 Drug/alcohol abuse.  
 growing number of people with movement disorders: Essential tremor  
 lack of health care providers in the area  
 mental health services -child psychiatry  
 Not enough focus on preventative, just fixing the problem once it happens.  
 Teen violence (teen mental health),  
 There are no dialysis treatment centers in or around Wayne County that I am aware of  
 There are no dialysis treatment centers in or around Wayne County that I am aware of  
 there is very little support to help elderly stay in their homes  
 Too many people on public assisstance are forcing working people to work too much overtime to pay for it.  
 We have a large population of poorly educated uninformed folks lead to many problems that include health problems

#### 2. PRIMARY HEALTH CARE: Other Access to Primary Health Care Problems

Ability to get into a doctor on a timely basis. Afraid to go to Emergency room because of high co-pay.

Cost of transportation  
 deaf community member are in definite need  
 Dental Insurance at a reasonable costs for all  
 Dialysis Services  
 few MD's or specialty resources in this county  
 I find that the physicians located in Wayne County are disinterested in the population that they serve  
 I think that the care is inconsistent. There is very good care and there is substandard care. Somehow it needs to be brought up at least to the higher level of care.  
 INSURANCE CARRIERS DO NOT RECOGNIZE THAT DUE TO A LACK OF SPECIALISTS AND FUNDS MANY PCPS TREAT MULTIPLE PROBLEMS AND MANY GYNs ARE THE ONLY HEALTH CARE SOME WOMEN GET AND FUNCTION AS ADHOC PCPS  
 Lack of medicaid providers Dentist that do not accept medicaid or Medicare leave a space before and after a parenthesis  
 low income ins. SHOULD cover ALL Dr prescribed medications & vitamins, but it DOESN'T !!!  
 MD's picky re insurances  
 Medicaid, CHP, FHP are available so that access to primary health care should not be a problem. If new to the area there will probably be a legitimate lapse in care/access.  
 My access to visit my primary care physician is delayed by waiting for an appointment while welfare recipients clog the system with minor ailments not requiring immediate care  
 need more help for seniors  
 Needs to be more availability of alternative health programs  
 No mass transit for those without available private transportation  
 Not enough home care allowance for elderly and hospice. Need more support and time for home care.  
 People don't understand how important going to the doctor is  
 Shifting health care from local facilities to Rochester  
 So few doctors you have to wait weeks for nonemergency appointments  
 Sodus medical has reduced the number of days in which to see a family doctor.  
 The Wolcott medical center has too many patients and not enough people and their secretaries are not friendly. It is hard to get your sick child in there.  
 There is a need for geriatric trained doctors and NP'S.  
 transportation  
 Transportation  
 under insured but not qualified for medicaid  
 under insured who don't qualify for medicaid

### 3. BEHAVIORAL HEALTH: Other Problems

ADHD  
 ARC and FLACRA are doing a great job providing services in the county  
 CHILD MENTAL HEALTH ISSUES  
 Dually diagnosed patients  
 If no insurance no access to these agencies  
 Most treatments by behavioral health professionals are unnecessary and unscientific  
 Such agencies need better staffing, facilities and transportation networks.  
 Supported employment programs for the mental health population in Wayne County  
 There are very good options for some people, but some programs are not well run and not as helpful as they could be.  
 There is a growing need but not enough providers.  
 Transportation to Lyons if in NE corner of county (ie-Red Creek)

you spelled developmental wrong  
youth with behavioral & emotional needs.

#### 4. VIOLENCE: Other Problems

children living in a home with no water, electricity, and parents who do drugs and drug activity around the children!!!!

I'm only aware of these issues from information received via media such as TV, local newspapers, internet, etc.

I'm only aware of these issues from information received via media such as TV, local newspapers, internet, etc.

verbal abuse towards someone with a movement disorder

violence against the general public by criminals who seem to go unpunished, and repeat offences due to their crimes being confused with behavioral health issues

#### 5. INJURIES: Other Problems

ATV's and snowmobile accidents in children and teens

falls with elderly in homes not being set up for handicapped problem

I don't know that our county has more than the average injuries in these areas.

I was not aware that using a cell phone was an injury.

snowmobiling

There are people I know or heard of that are cutters, including my daughter, which was killed in a car accident because the driver had used vicodin and was drinking.

So yes I do believe there are issues there. I think the drinking and drug use is not strict enough and the cutters no one hears about because it is kept quiet because it is not understood.

#### 6. ENVIRONMENTAL: Other Problems

chlorinated drinking water and swimming pools

forced fluoridation of my municipal water against my wishes. Public water systems should not be used for "medication" of the public, especially when there is little evidence that systemic use of fluoride instead of a topical application has much value

I only feel that water and septic systems might be a problem in our county because both situations exist for many of our county residents.

no financial resources available for lead abatement to families trying to comply with state/county regs.

previous toxic dumps, contaminated our wells etc

village and city water contain the most death causing chemicals and poisons known to be used in 2nd WW

We have more agricultural chemical exposure in Wayne county because of the farmland; whereas in the city you have more air pollution.

Yes, workers in local factories are exposed to hazards and are made feel that this is part of their job.
