

Breast, Cervical, and Colorectal Cancer Screenings for Men and Women

The Cancer Services Program of Ontario, Seneca, and Yates Counties provides breast, cervical, and colorectal cancer screenings FREE to men and women who meet program eligibility. The priority population for this program is women ages 40 years and older, and men ages 50 years and older, who are at or below 250 percent of the federal poverty guideline. Some women under 40 years of age are also eligible for mammograms if they meet certain criteria such as a family history of breast cancer or an abnormal breast finding.

In addition to cancer screening services, the program provides case management services to assist men and women who require diagnostic follow-up after their initial screenings. Case management services may include helping individuals navigate the health care system, obtain transportation, obtain childcare or translation services, and overcome barriers that may prevent appropriate follow-up testing and care.

If an individual is diagnosed with breast, cervical, or colorectal cancer through this program, a special Medicaid insurance is available to them. The program representative will help with the application process.

This program has representatives in each county to assist you with signing up and receiving the screenings and services. The screenings and services are provided at Ontario and Yates County hospitals as well as many area physician offices in all three counties. Please contact the case managers in the county in which you live for more information:

Ontario County Case Manager:

Sue McNear BSN
Ontario County Public Health
3019 County Complex Drive
Canandaigua NY 14424
